

Who we are.

We are an Operational Consulting Company that delivers profit through performance improvement of any manufacturing, engineering, or business process. We are engineers who use our technical ability to solve problems in a variety of settings – automotive, food & drink, consumer goods, healthcare, and most recently energy. We are growing by 25% year on year.

Who you are.

You have an entrepreneurial spirit. You aren't afraid to challenge convention, to innovate, and have the conviction to follow through with your ideas. You love people, you enjoy traveling, and you avoid the status quo. You want to get the most out of your career and your life!

What you'll do.

This is not a desk job. As a consultant you will be working with all levels of a business from the shop floor to the boardroom on a daily basis. Spending your time on the front line with a welder, machine operator or technician will help you fully understand the problems that they face. You'll roll up your sleeves, run trials, and observe the problems first hand. This will give you the insight, credibility, and confidence you need to set the direction in the boardroom. Your technical, problem-solving ability will allow you to tackle complex problems, implement change, and ensure improvement is seen on the financial bottom line. We find this approach much more effective and enjoyable than simply writing reports.

Life at Isaac.

We push ourselves, in all aspects of our lives. You will be given a lot of responsibility early on in your career. You will be challenged beyond your comfort zone, but we'll be there to support you – every step of the way. We tend to embody the '*work hard play hard*' ethos, and part of this is a rule that we don't work on weekends. As of 6pm on Friday, your only job is to make the most of the weekend.

Why work for us?

- Our entry level positions start at \$60,000–\$70,000 and includes profit sharing in your first year.
